

NUR 112 NCLEX Practice Questions: Final Exam

Practice with NLCEX type questions is a helpful study tool prior to a Nursing 112 exam and for NCLEX success upon graduation. Below is a resource recommended by the 112 teaching team. It is not mandatory that you purchase this book, but if you do you will be able to use it as a study tool throughout the nursing program. Faculty have one copy of this textbook available for student use during office hours. The MCC library also has a copy of this textbook on reserve (with a two hour time limit for use). **Chapter 5 of this text, Test Taking Strategies, provides excellent suggestions as you begin to prepare for the final exam.**
